

CONTAINERns. mod. 70

Made with EN AW-5754 UNI EN 573-3 light alloy plate and extrude section bar in alloy EN AW-6060 UNI EN 573-3.

Standard execution in not-anodised plate.

Smooth walls with horizontal stiffening ribs in the 4 corners.

Superior perimetral beading profiles of the container and of the lid bent directly on the metal sheets, without the use of nails, rivets, and welding to guarantee the maximum holding to mechanical stress; the lid is closed thanks to a sturdy lever lock.

Open slot on the lid for documents 325 x 40 mm.

The lid is provided with die-cast aluminium stacking corners.

2 drop handles in light alloy, situated at the 2 sides.

Internal dimensions: 380 x 350 x 550 h mm

External dimensions: 425 x 400 x 565 h mm

- Optionally the container can be equipped with a sturdy removable light alloy support base, provided with 4 swivel wheels at the corners.
- **Alternatively**, the container can be fitted with 4 - 50mm swivel wheels under the base. In this case the stacking corners will not be required.
