ORDER PICKING TROLLEYS

ORDER PICKING TROLLEYS

ORDER PICKING TROLLEYS

It is essential to have the right equipment when picking products in a warehouse or similar facility. This is to ensure the safety of employees and efficiency of workflow.

Shelfspan's order picking trolleys are specifically designed for loading, transporting and unloading boxes and packages of different shapes, sizes and weights

Accessories such as the handle, side/back grids and shelf dividers make these trolleys very easy to use, products can be easily organised on each shelf level.

Swivel castors make the trolleys highly manoeuvrable and the 2 braked castors means they can be secured in place during the loading/unloading process.

Upgrade Available

- Constructed from mild steel finished in hard wearing polished chrome, with or without standard 75mm castors

CHROME-WIRE TROLLEYS

CHROME-WIRE TROLLEYS ESD SAFE SYSTEM

ESD (ELECTROSTATIC DISCHARGE) SAFE CHROME WIRE TROLLEYS ARE AVAILABLE IN THE FULL RANGE OF SIZES AND ACCESSORIES.

If storing electrical devices on metal shelving, it is important to ensure it is ESD safe! We have that covered with a selection of ESD components too.

Intense heat from ESD can melt or vaporise the small parts within the device, causing it to stop working or significantly shorten the devices lifetime. To make our Eclipse® chrome wire shelving and trolley systems ESD safe, all that is required are conductive collars with metal base plates, conductive feet, or anti-static castors.
